

HF Insider

The Latest News and Resources for
Honeywell Hydrofluoric Acid Customers

Welcome to the 2016 Spring edition of the HF Insider, Honeywell's newsletter dedicated to hydrofluoric acid (HF). We are committed to keeping our customers, employees, and our communities well informed. We continue to appreciate the opportunity to collaborate with you to enhance your training on HF safe use, handling, medical procedures, emergency response and many other important topics.

Our HF technical and account team members are dedicated to providing superior service to you. If there are opportunities for us to help improve your experience, please let us know.

In this **HF Insider** edition, we introduce new team member Sherea Lizaso, share news about a new HF order web portal designed for your convenience, provide a recap of the 2015 HF Roundtable and share a number of training opportunities. Please let us know if there are topics you'd like us to discuss in future editions.

Thank you and enjoy!

Best regards,

Cheryl Wilkinson

Technical Services Manager, Industrial Product

Meet Our New Team Member

Sherea Lizaso,
Sr. Product Marketing Specialist, HF/BF3,
Industrial Fluorines

Education: Bachelor's degree in communications and an MBA from Rutgers, a master's degree in communications from New Jersey Institute of Technology.

Experience: I began my career at Honeywell in 2015. Prior to Honeywell, I spent about 15 years in a variety of marketing, product management, business management, and procurement roles. Most recently, I worked in a procurement role at Unilever, a global consumer manufacturer of personal care and refreshment products.

Typical work week: There is no typical week (laughs). I work closely with Kori Anderson, Global Business Manager, HF/BF3 and many of our functions to support our customers and ensure that we meet our business goals. For example, I work with the sales team, operations, procurement, R&D, logistics, quality and essentially, any of the functions that support our HF/BF3 customers. We mainly focus on ensuring product quality, reliable service and safety.

Best part of working at Honeywell: In managing the product marketing activities, I like collecting "voice of the customer" information and then working with our cross-functional Honeywell team to design and implement plans that will continually improve the way we support our customers. I enjoy taking an analytical approach to problem-solving and Honeywell's culture encourages that type of thinking.

Dream job if not at Honeywell: Working at Honeywell has been a goal of mine and I am grateful to have achieved it. Volunteer work is also important to me and The Ronald McDonald House is close to my heart. It helps families with children undergoing critical medical treatments. I plan to continue my service to charities that can directly change lives for the better.

Family: I am originally from the New England area and I stay connected to family and friends.

Hobbies/Interests: I enjoy doing DIY projects and crafts. I also like to keep up with the latest software and electronic gadgets. I enjoy traveling and learning about different cultures. I have a real appreciation for the arts, history and literature as well.

Coming Soon! A New Web Portal To View HF Acid Orders

Honeywell is preparing to launch a new HF Acid Order Web Portal as another way to help you keep tabs on your orders. This new Order Web Portal is ideally suited for anyone needing to review HF order details, especially those in purchasing or production roles.

The on-line portal will enable you to:

- Create individual log-in credentials to obtain order information 24/7
- Review purchase history
- Utilize the search function to locate orders of interest quickly and conveniently
- View or print associated documents such as order acknowledgments, invoices, and bills of lading
- Correspond with HF Customer Service regarding your order

Watch for details coming soon about how to register for the HF Acid Order Web Portal.

Upcoming Events:

Plan to Attend UOP's 2016 HF Alkylation Technology Symposium

June 13-16, 2016
Park Hyatt Aviara
San Diego, California

HF Alkylation users travel from around the globe to attend this conference, making it an excellent opportunity to learn more about the latest in safety and operational guidelines and to share best practices with industry peers and UOP experts. Technical sessions will cover a range of topics including:

- Operations
- Safety and Environment
- Corrosion and Inspection
- Maintenance
- Process Design
- Materials Engineering
- Mechanical Design
- Laboratory Sampling and Techniques
- Turnarounds
- And much more...

Interested in attending?

If you or someone you know may be interested in attending this symposium, [click here](#) to request a formal invitation.

Hydrogen Fluoride Safety Seminar - Save the Date!

The Hydrogen Fluoride Panel of the American Chemistry Council (HF Panel), along with the Hydrogen Fluoride Industry Practices Institute (HFPI), is pleased to announce that the next **Hydrogen Fluoride Safety Seminar** will be held **August 9-11, 2016** at the Westin Hilton Head Island Resort & Spa in Hilton Head, South Carolina.

The member companies of the ACC HF Panel and the HFPI recognize the significant safety considerations surrounding the use of HF (anhydrous and aqueous). Member company representatives and others who work in this industry meet periodically to foster an exchange of information concerning HF safety practices, including handling, transportation, security, environmental control and first aid/medical treatment. The overall philosophy of the Hydrogen Fluoride Safety Seminar is safety through education and sharing of experiences, and focuses on specific topics of concern to companies involved with hydrogen fluoride and HF solutions at any concentration.

ACC Meeting Services will be sharing registration details for this event so mark the dates. Contact the ACC for more information.

HF Roundtable Review

The 2015 HF Roundtable was held in beautiful San Antonio, Texas. This symposium followed previous HF Roundtables with industry experts representing a wide range of HF users and industry related suppliers. The 2015 HF Roundtable was a landmark event as we celebrated two significant milestones. We celebrated the 10th anniversary of the HF Roundtable and the 100th anniversary of the first Honeywell HF manufacturing patent.

Our keynote speaker was Gabriel Alvarado. Gabriel delivered a powerful and moving personal story of a work related accident. While the incident was life changing, Gabriel has found his voice in sharing his story and the benefits of emergency response training.

A variety of HF related topics and speakers rounded out the event. Participants enjoyed networking opportunities outside of the technical sessions to exchange information and share best practices with their peers.

Planning is underway for the 2017 HF Roundtable. If you would like suggest a topic or present a topic please use the link at the bottom of the article to contact us.

We look forward to seeing you at the 2017 HF Roundtable.

2016 Hydrofluoric Acid Technical Services Schedule

To register for any of our live webinars, please visit www.hfacid.com select the Contact Us tab, and fill out the form for the webinar(s) you wish to attend.

LIVE ONLINE TRAINING

Anhydrous HF Safety, General Awareness and First Aid Training

April 12, 2016 – 2:00 p.m. ET

October 11, 2016 – 2:00 p.m. ET

Aqueous HF Safety, General Awareness and First Aid Training

April 13, 2016 – 2:00 p.m. ET

October 12, 2016 – 2:00 p.m. ET

Recommended Medical Treatment of HF Exposures

April 14, 2016 – 1:00 p.m. ET

October 12, 2016 – 1:00 p.m. ET

HANDS-ON EMERGENCY RESPONSE TRAINING

To make response exercises meaningful to all participants, the number of attendees at each session is capped at 25. Participants will be responsible for travel, lodging and meal expenses. Honeywell will assume the cost of the training and sponsor one group dinner. Lunch will be provided during the incident response exercise on the third day.

HF Emergency Response Training

April 19 – 21, 2016 **CLASS FULL**

October 18 – 20, 2016

24/7 PRE-RECORDED ONLINE TRAINING

Access to this section of the website is restricted to current Honeywell HF customers in North America and their employees. Register today for your username and password to use the training materials at your convenience all year long.

- Recommended Medical Treatment of HF Exposures
- General Awareness, Safety and First Aid Training for Anhydrous HF
- General Awareness, Safety and First Aid Training for Aqueous HF
- Corrosion of Carbon Steel by HF

Register online at: www.hfacid.com. Free of charge for all Honeywell HF customers.
